Daftar isi

1. Master flowchart — perjalanan HR
2. Flowchart chatbot & intent
3. Flowchart matching pipeline
4. Fitur Auth + screenshot
5. Fitur Dashboard + screenshot
6. Fitur Unggah CV & Lowongan + screenshot
7. Fitur Chatbot Matching + screenshot
8. Fitur Bank Kandidat + screenshot
9. Fitur Settings + screenshot
10. Ringkas data model & catatan teknis

Start / End Proses UI Proses sistem Keputusan Input / Output

1. Master flowchart — perjalanan HR

Alur utama dari login sampai shortlist kandidat.

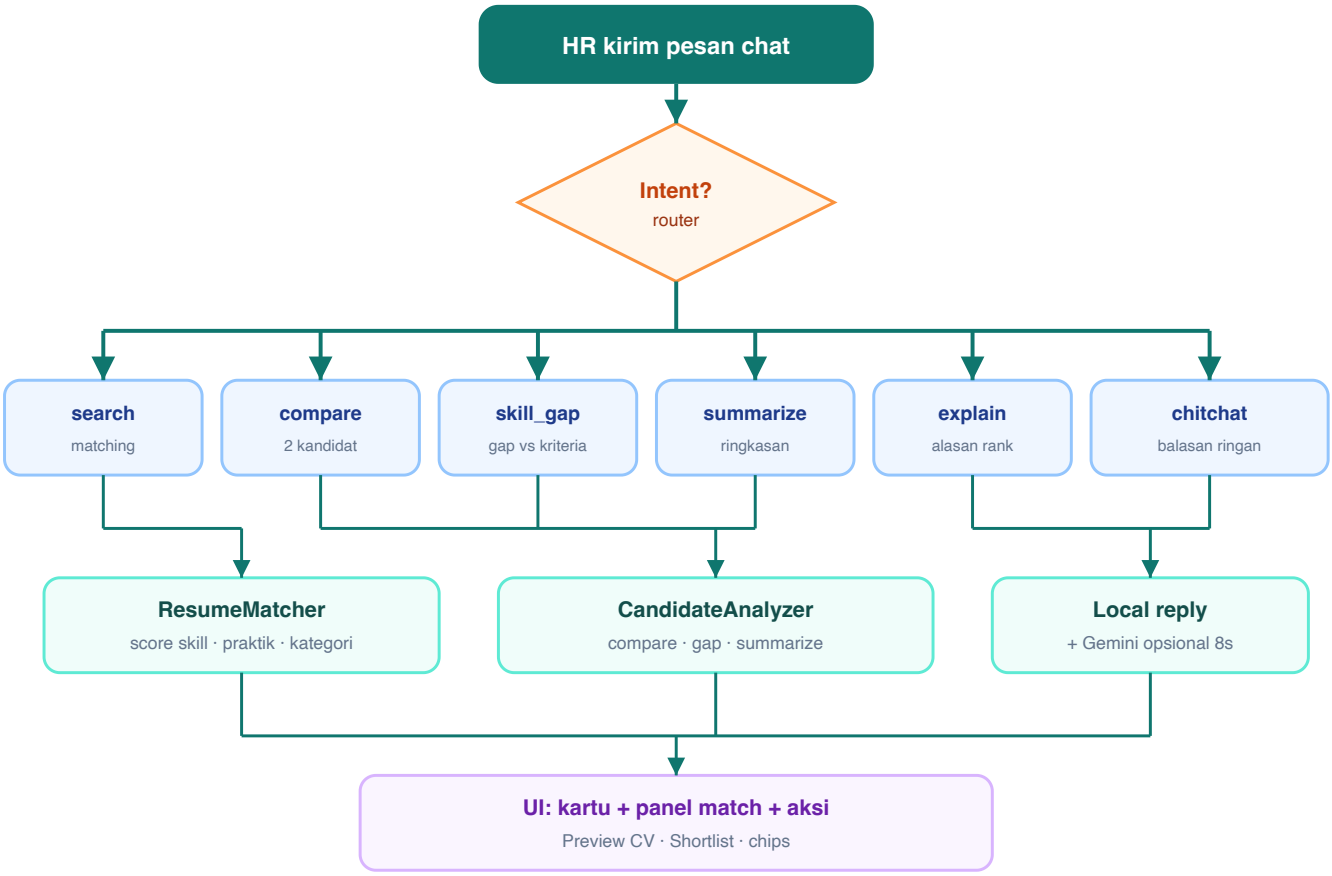

Penjelasan alur

1. **Login** — HR masuk ke aplikasi (demo: `hr@aira.test`).
2. **Dashboard** — melihat jumlah CV, lowongan aktif, aktivitas chat.
3. **Tiga pintu kerja**: unggah CV/lowongan, chatbot matching, atau browse bank kandidat.
4. **Matching & analisis** — sistem ranking + komparasi/skill gap.
5. **Preview CV** — tinjau dokumen, lalu **Shortlist**.

2. Flowchart chatbot & intent

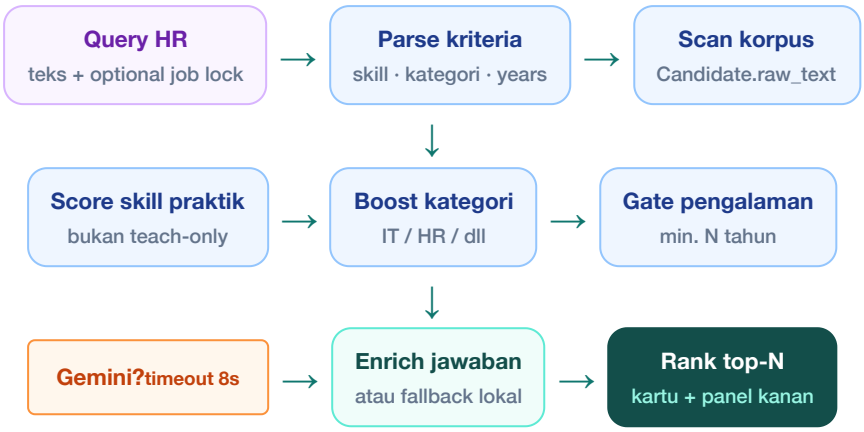

Setiap pesan HR diarahkan ke intent, lalu ke service yang sesuai.

Intent	Contoh input HR	Service	Output UI
`search`	“IT Python SQL min 3 tahun”	ResumeMatcher	Kartu rekomendasi + panel skor
`compare`	“Bandingkan peringkat 1 dan 2”	CandidateAnalyzer	Tabel komparasi siapa unggul
`skill_gap`	“skill gap #1” / ID kandidat	CandidateAnalyzer	Sudah ada vs Belum ada
`summarize`	“ringkas kandidat ini”	CandidateAnalyzer	Ringkasan kualifikasi
`explain`	“kenapa #1 cocok?”	Analyzer / local	Alasan ranking
`chitchat`	“halo”, “terima kasih”	Local (+ Gemini)	Balasan ringan

3. Flowchart matching pipeline

Detail proses `search` dari query sampai ranking.

> **Aturan kualitas ranking:** pengalaman praktik diutamakan dibanding CV “instructor/mengajar saja”. Kategori yang cocok mendapat skor tambahan. Gemini tidak boleh menggantung chat — bila 503/timeout, balasan lokal tetap dikirim.

Contoh happy path

1. HR: “Saya butuh kandidat IT yang kuat di Python dan SQL, minimal 3 tahun”
2. Intent = `search` → ResumeMatcher
3. Hasil: 10 kandidat, 5 ditampilkan di chat, sisanya di panel
4. HR klik “Bandingkan 1 vs 2” → intent `compare`
5. HR klik Preview CV → sheet PDF/teks → Shortlist

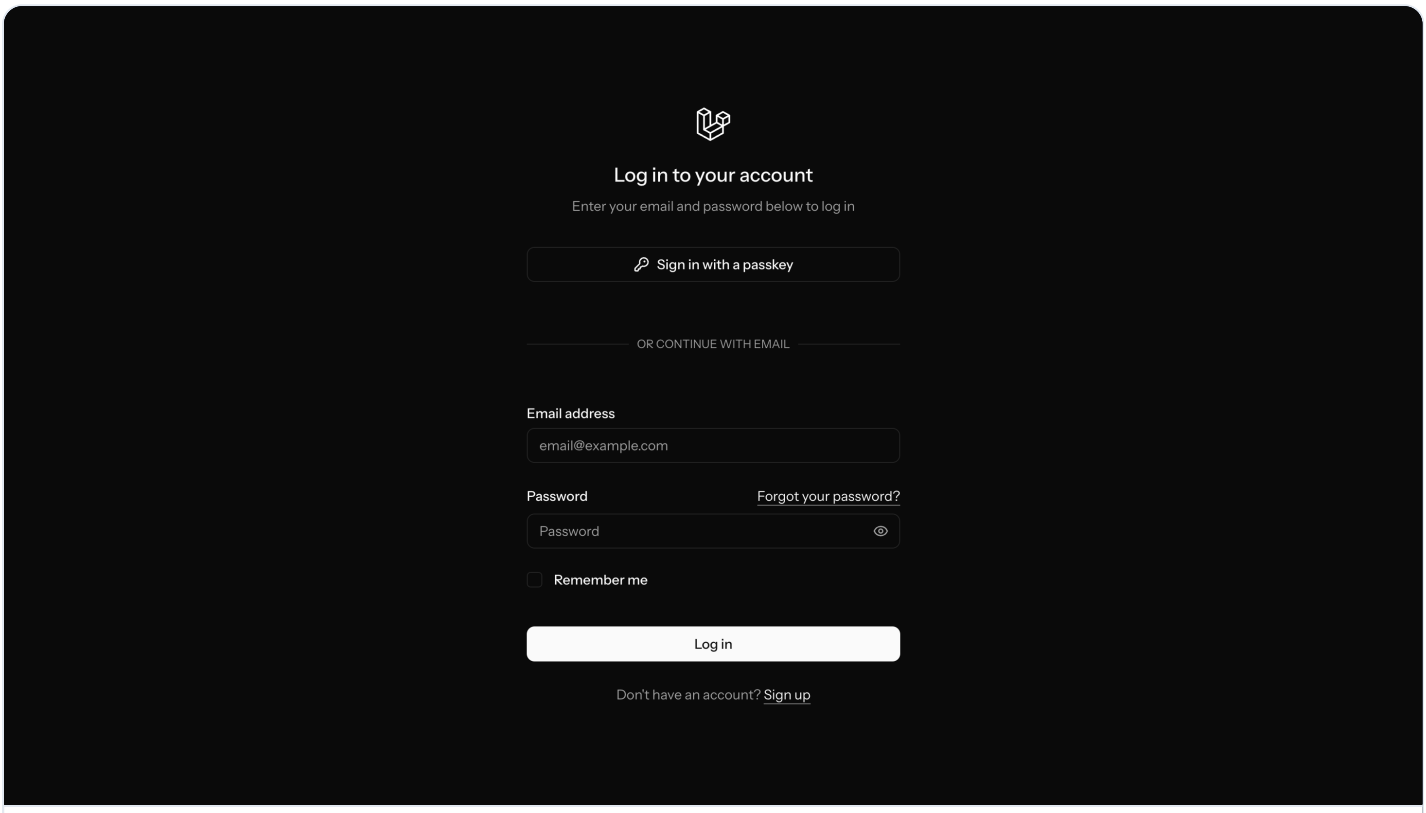

4. Fitur Auth

Apa fungsinya?

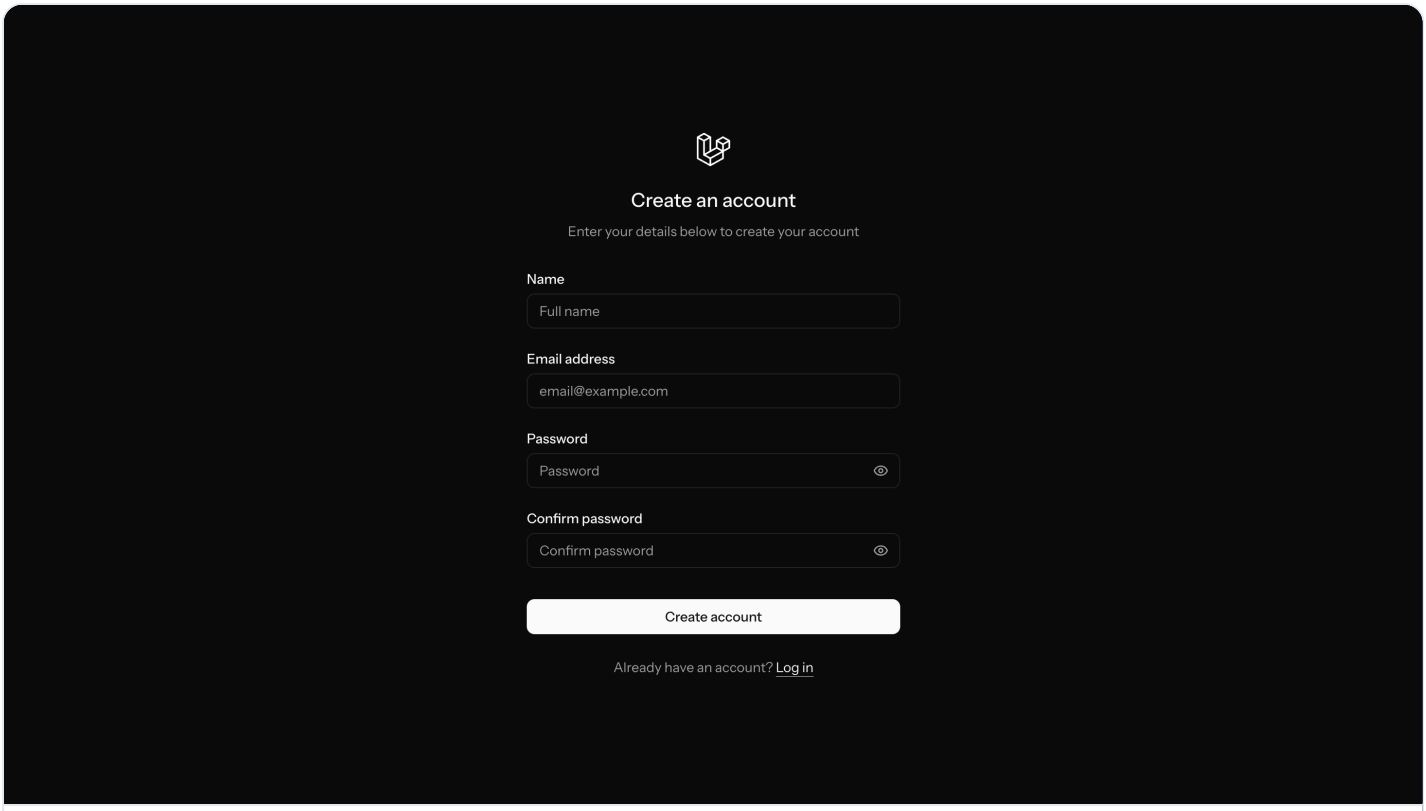

- Login email/password atau passkey
- Register akun baru
- Forgot password & session logout
- Guest di `/` dialihkan ke login

Flow singkat

Login — `/login` · email, password, passkey, remember me

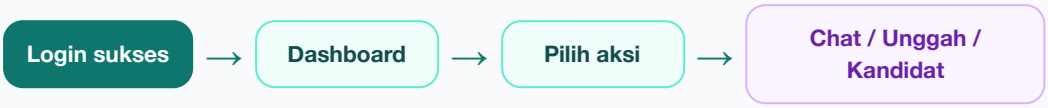

Register — `/register` · nama, email, password, konfirmasi

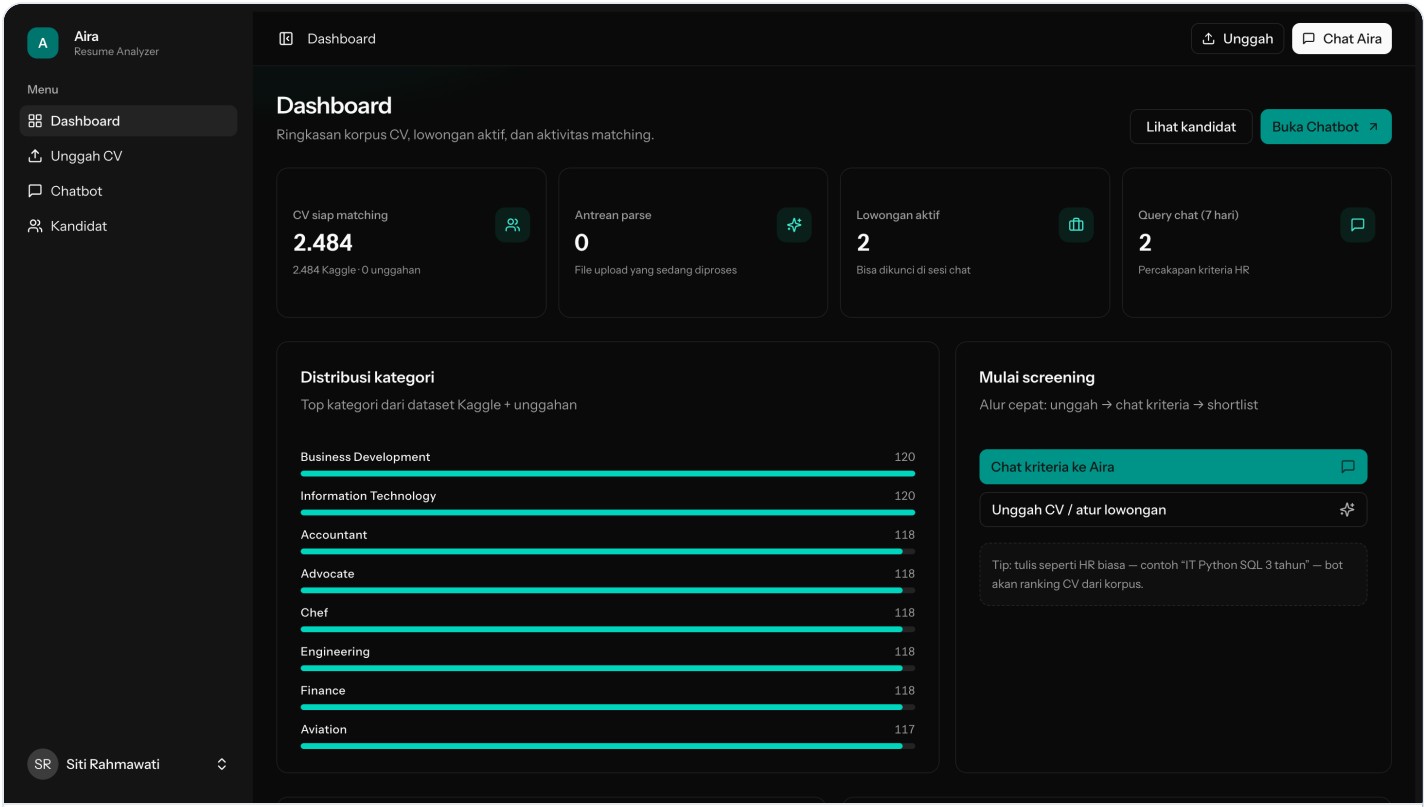

5. Fitur Dashboard

Apa fungsinya?

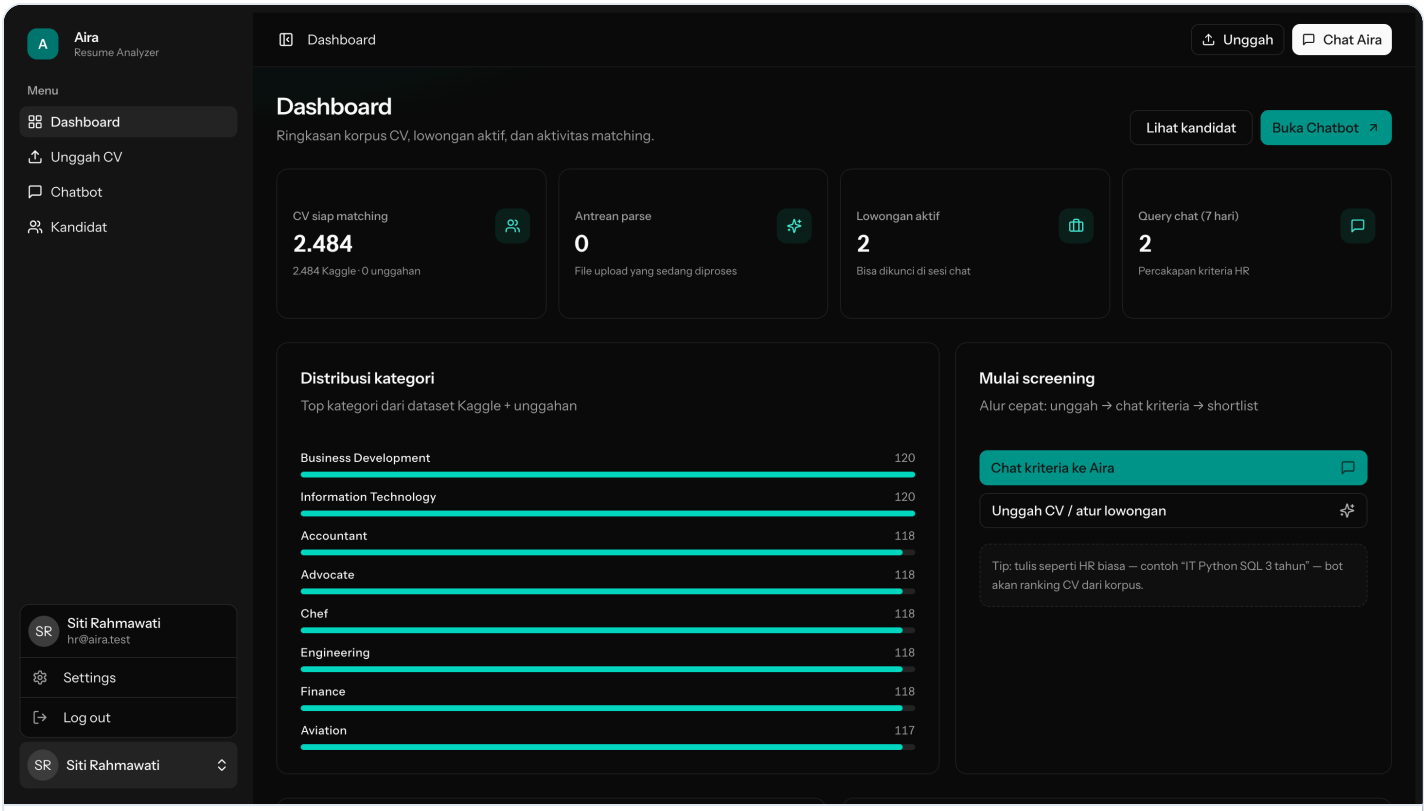

- Ringkasan korpus: CV siap matching, antrean parse, lowongan aktif, query chat 7 hari
- Distribusi kategori CV (Kaggle + upload)
- Shortcut cepat: Chat kriteria, Unggah CV, Lihat kandidat
- Daftar lowongan tersimpan & kandidat terbaru

Flow singkat

Dashboard — `/dashboard` · metrik, distribusi kategori, alur cepat screening

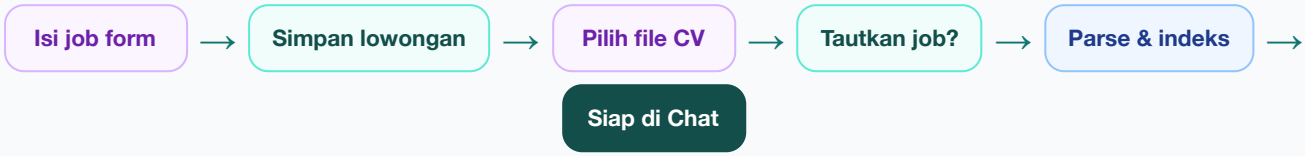

User menu — Settings & Log out dari sidebar profil

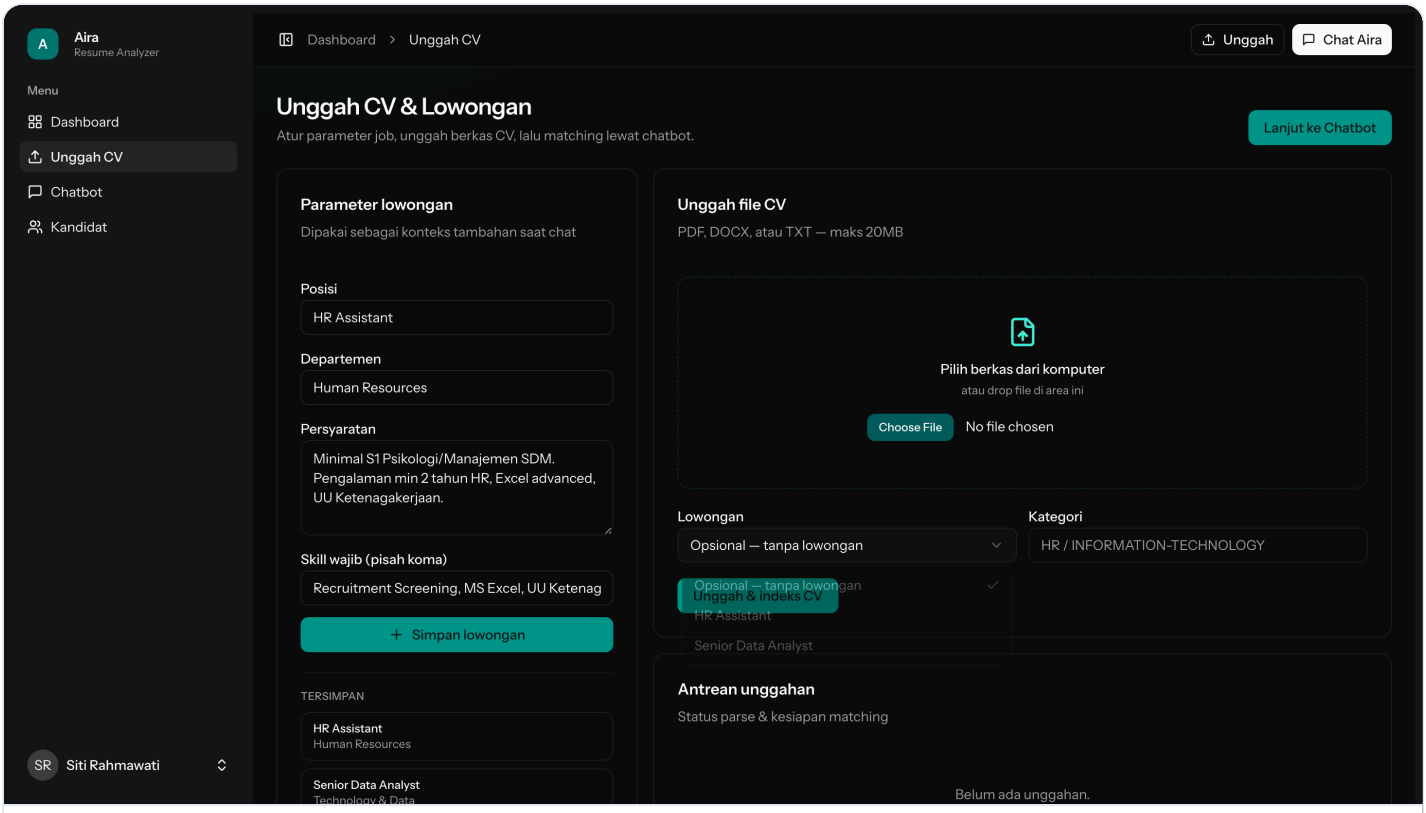

6. Fitur Unggah CV & Lowongan

Apa fungsinya?

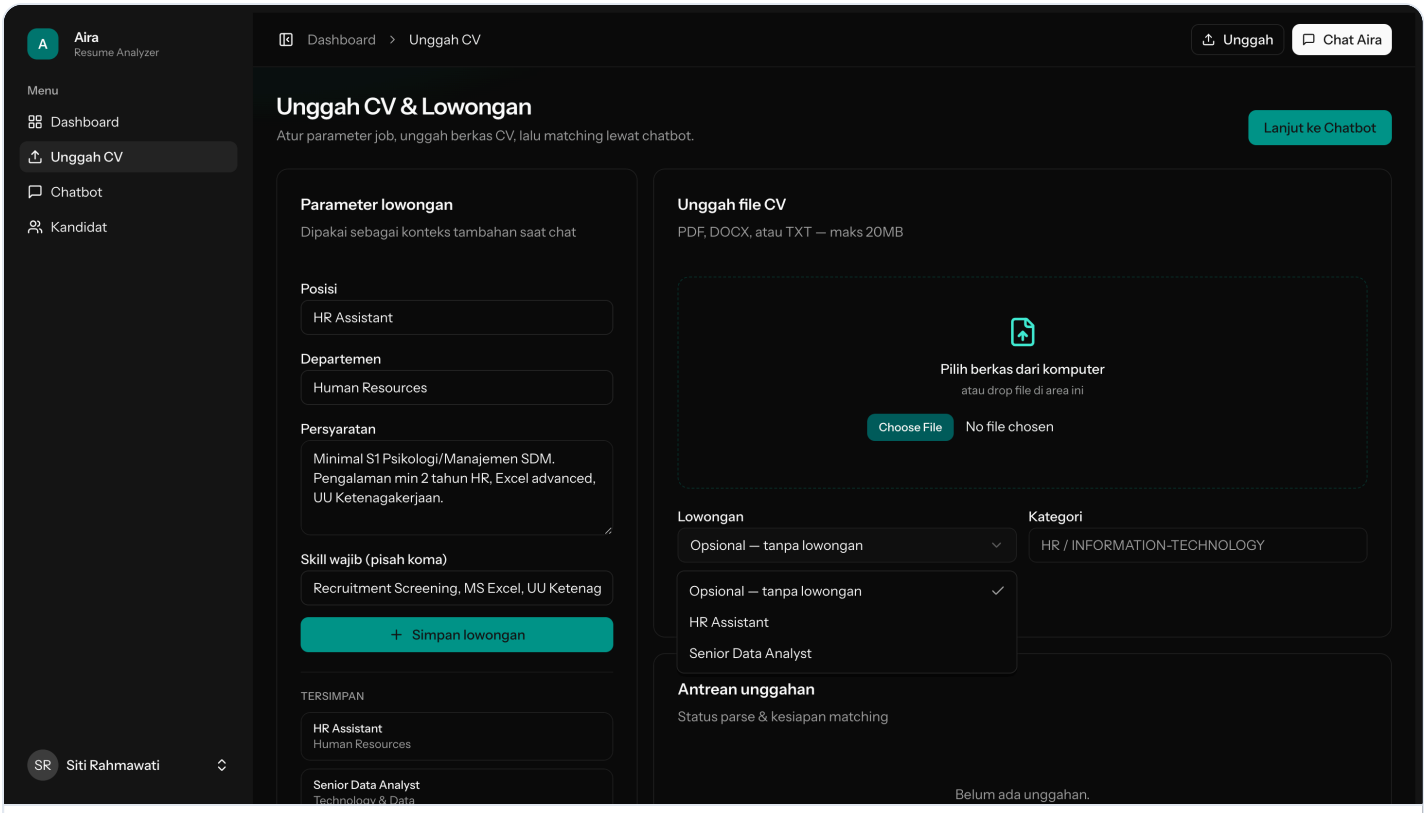

- Buat/simpan parameter lowongan (posisi, departemen, persyaratan, skill wajib)
- Upload file CV (PDF / DOCX / TXT, maks ~20MB)
- Opsional tautkan CV ke lowongan + kategori
- Indeks teks agar ikut matching di chatbot

Flowchart

Unggah CV & Lowongan — `/uploads` · form job kiri, upload kanan, antrean parse

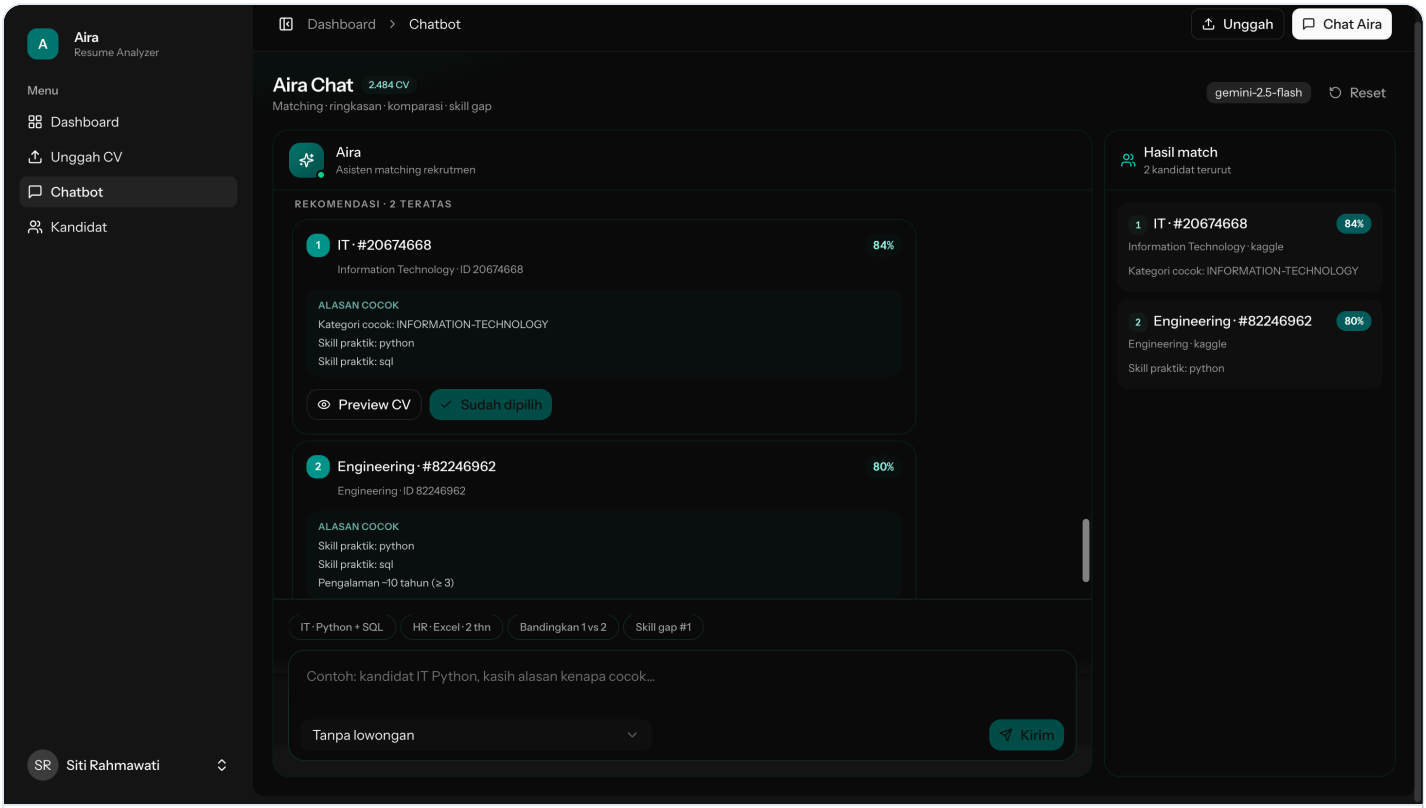

Dropdown lowongan — pilih “tanpa lowongan” atau job tersimpan saat upload

7. Fitur Chatbot Matching

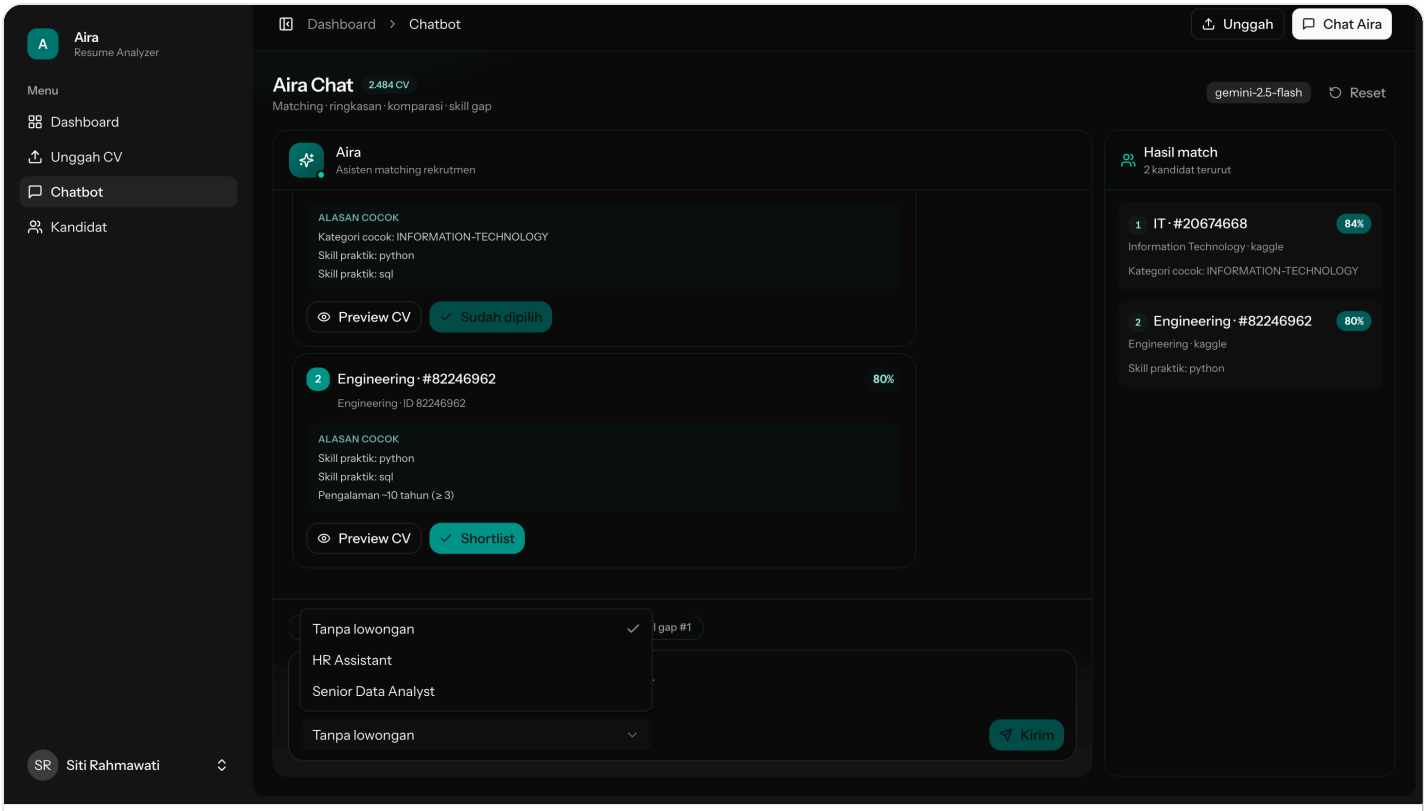

Apa fungsinya?

- Matching kriteria bahasa natural (skill, kategori, pengalaman)
- Ringkasan kualifikasi, komparasi 2 kandidat, skill gap
- Panel kanan “Hasil match” sinkron dengan jawaban terakhir
- Lock lowongan di composer (FieldSelect naik ke atas agar tidak terpotong)
- Quick chips: template query & aksi analisis
- Preview CV + Shortlist dari kartu

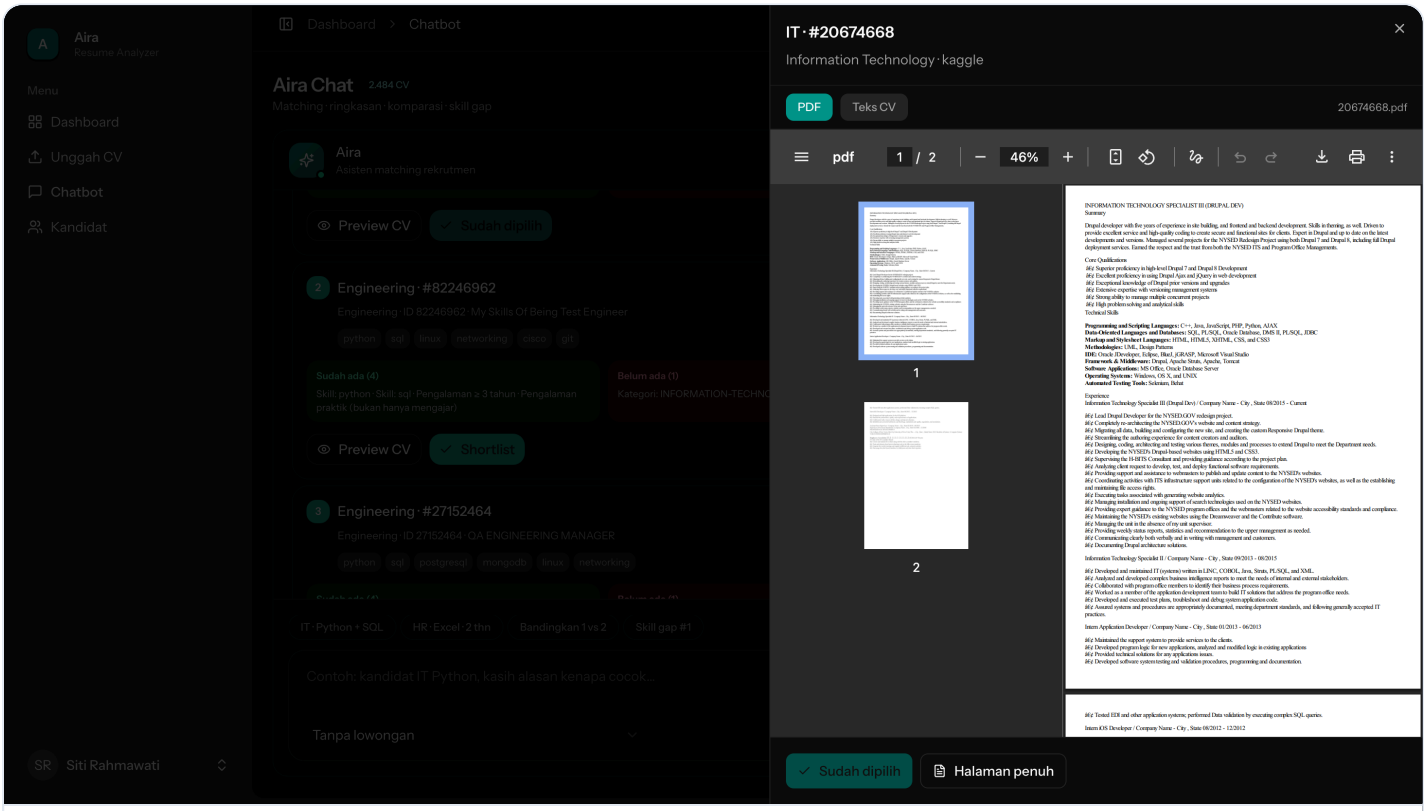

Chat utama — `/chat` · rekomendasi, alasan cocok, panel hasil match, chips & composer

7b. Chat — select lowongan & preview CV

Select lowongan di composer — Tanpa lowongan / HR Assistant / Senior Data Analyst

Preview CV dari chat — sheet kanan, mode PDF/Teks, shortlist, halaman penuh

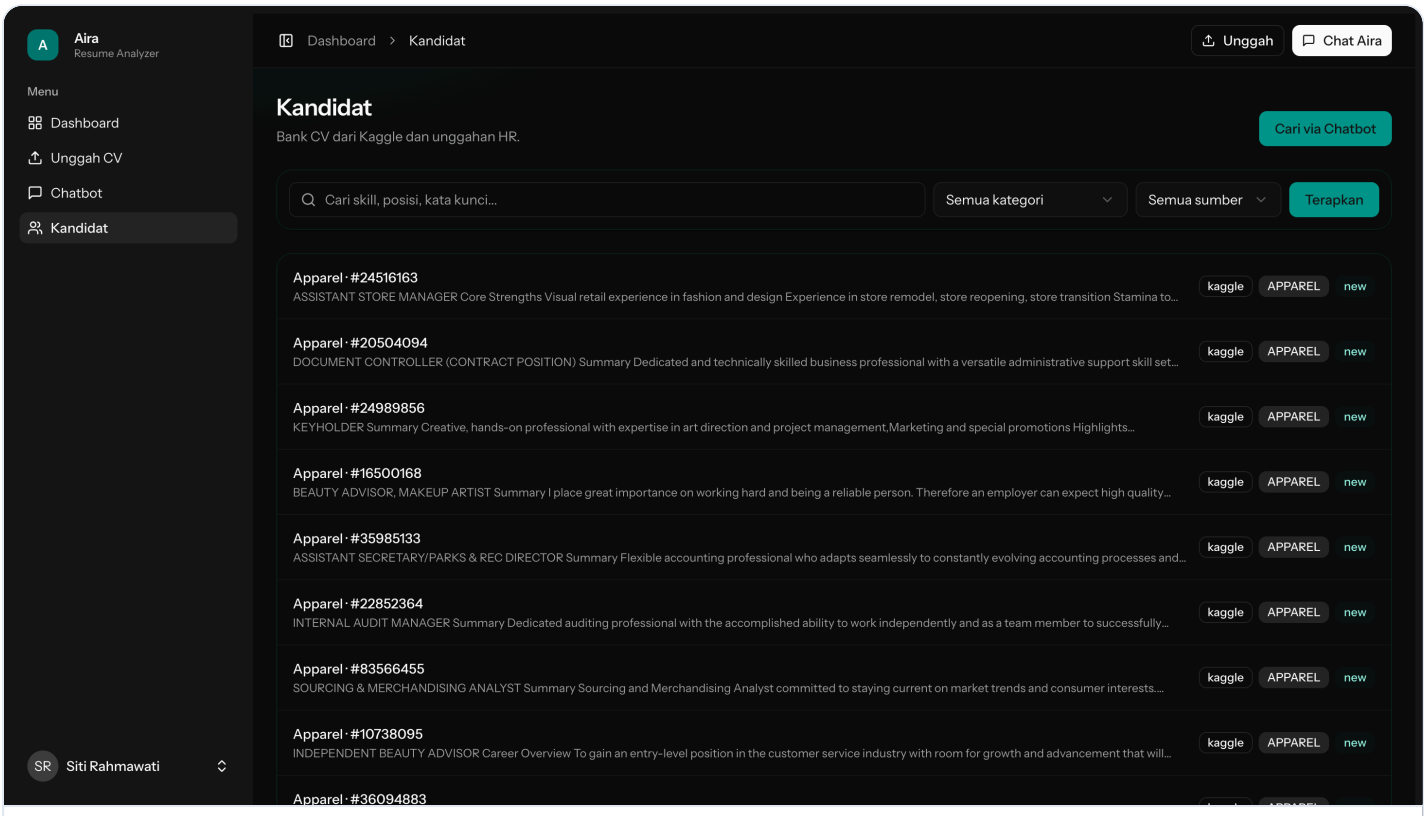

8. Fitur Bank Kandidat

Apa fungsinya?

- Browse seluruh korpus CV (Kaggle + upload)
- Cari teks (skill/posisi/kata kunci)
- Filter kategori & sumber, lalu Terapkan
- Pagination korpus besar
- Klik baris → preview sheet (sama komponen dengan chat)

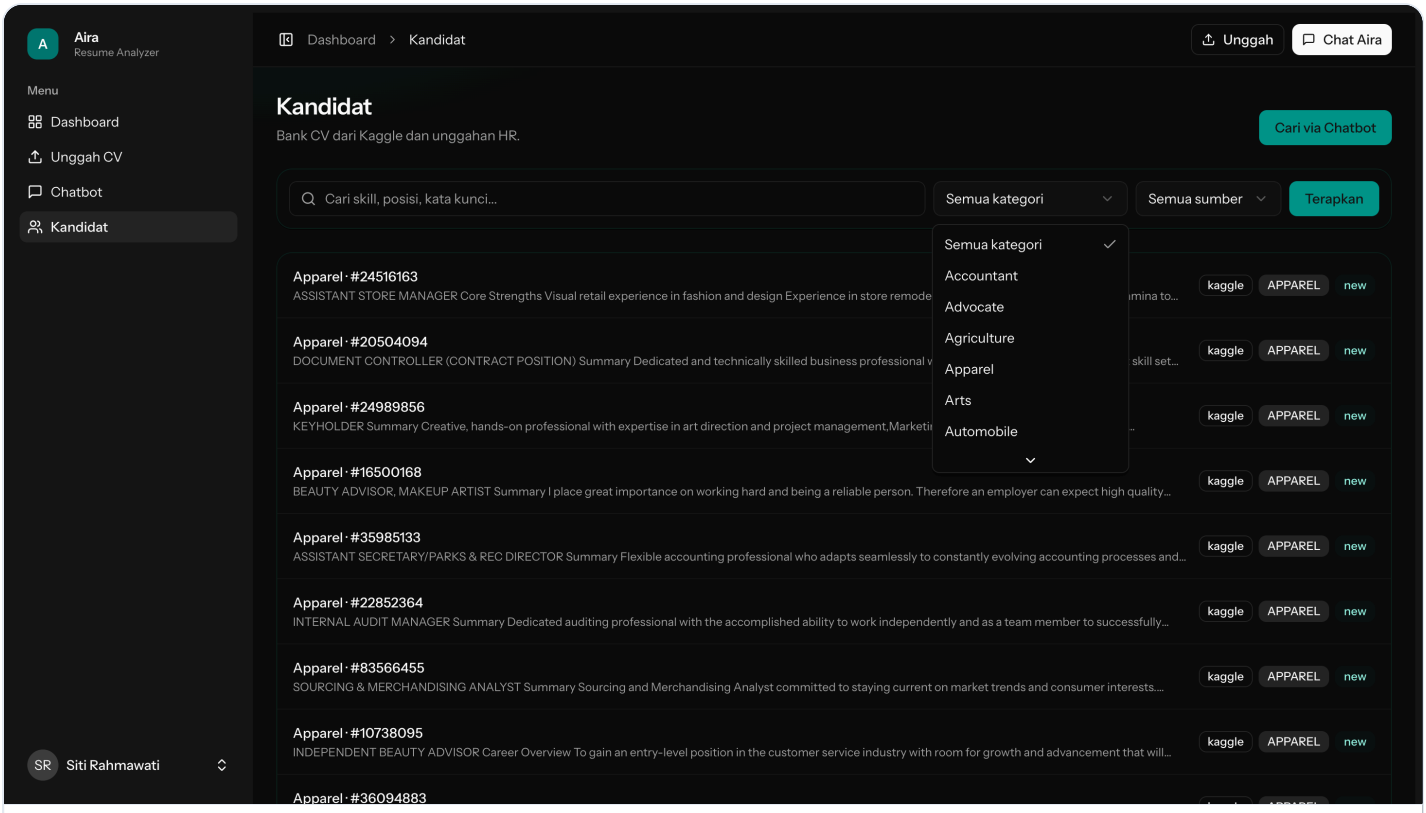

Flowchart

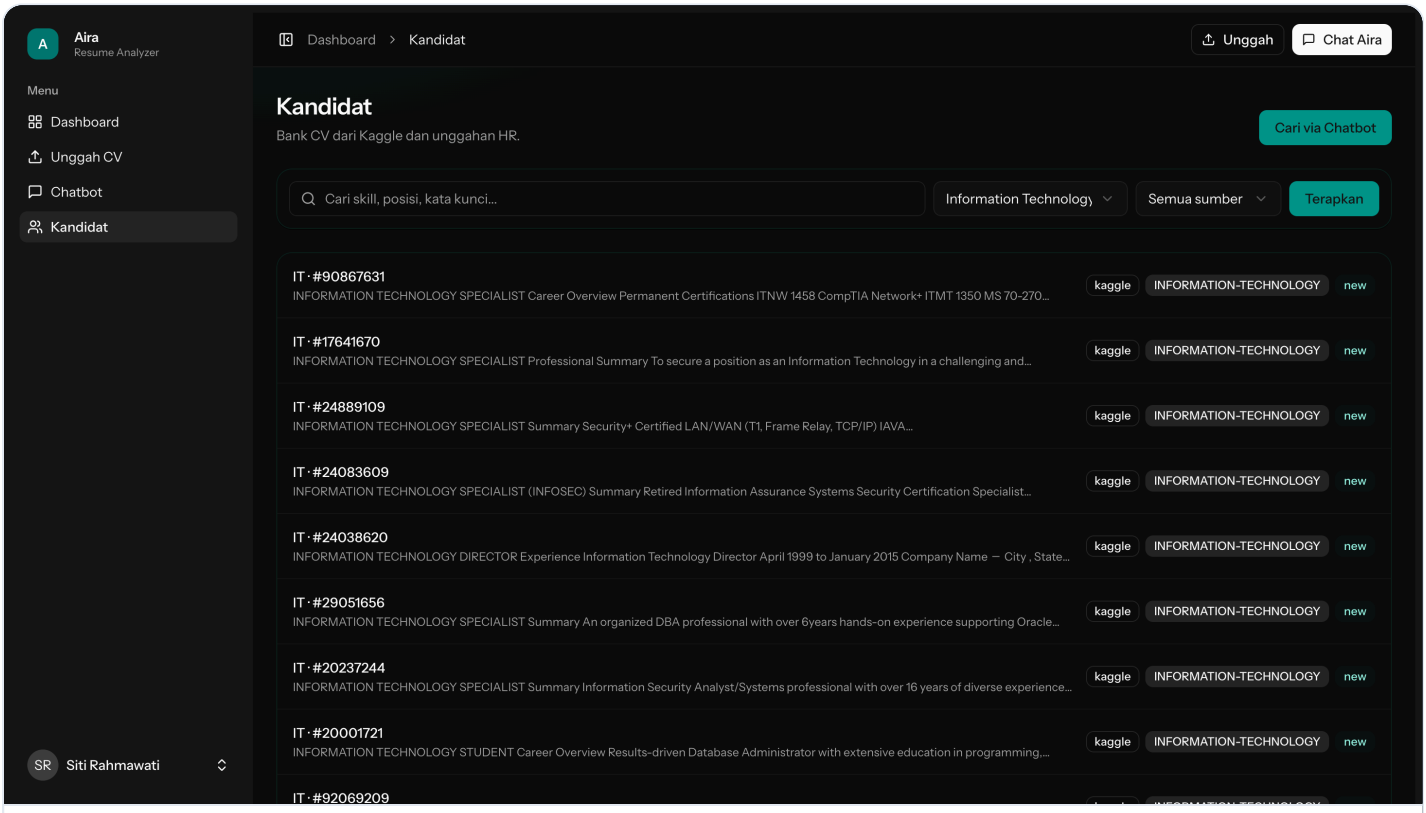

List kandidat — `/candidates` · search, filter, badge sumber/kategori/status

8b. Kandidat — dropdown, filter, preview

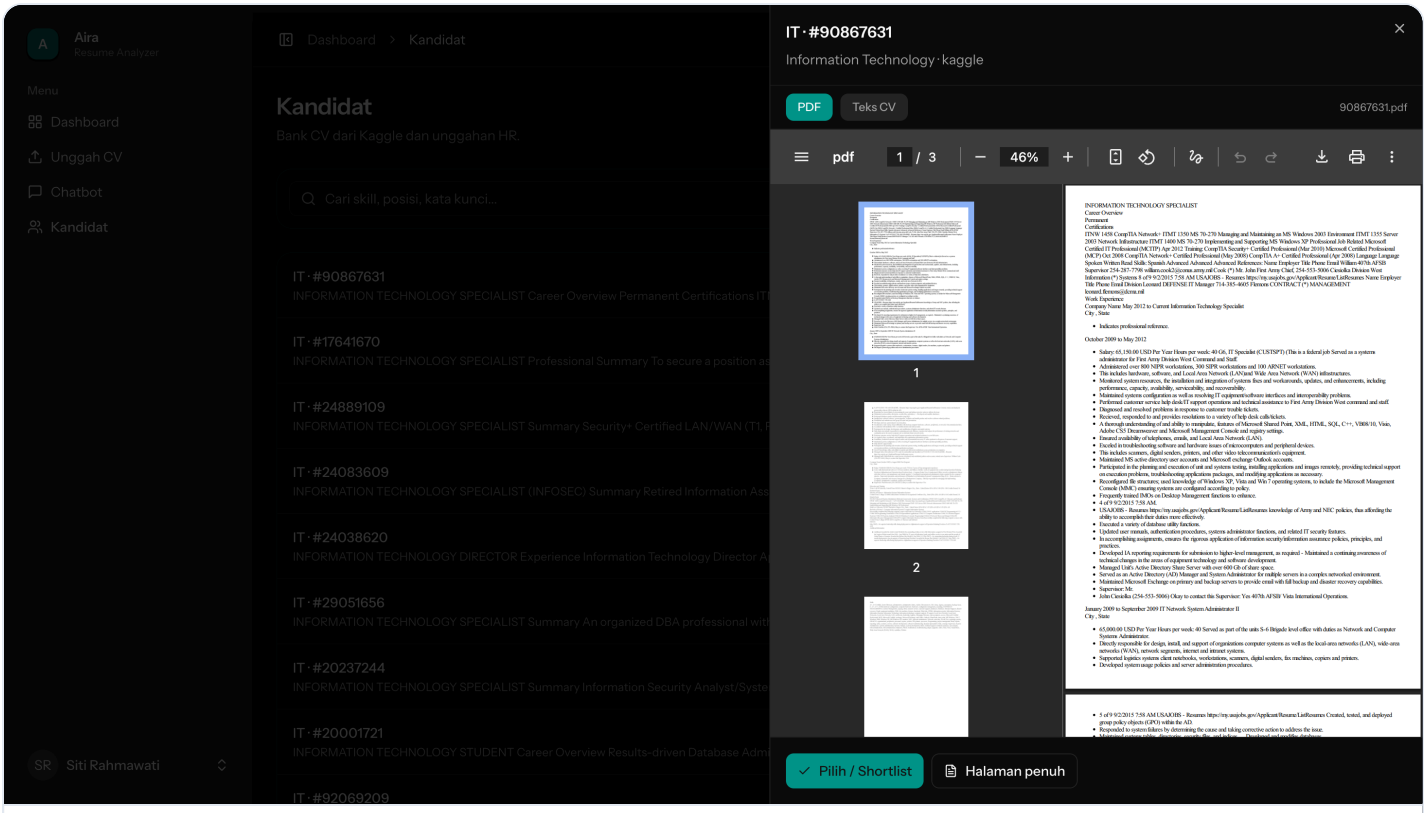

Dropdown kategori — FieldSelect scrollable (Accountant … Teacher)

Hasil filter Information Technology — list hanya kandidat IT

8c. Preview CV dari bank kandidat

Preview sheet kandidat — PDF viewer, shortlist, buka halaman penuh

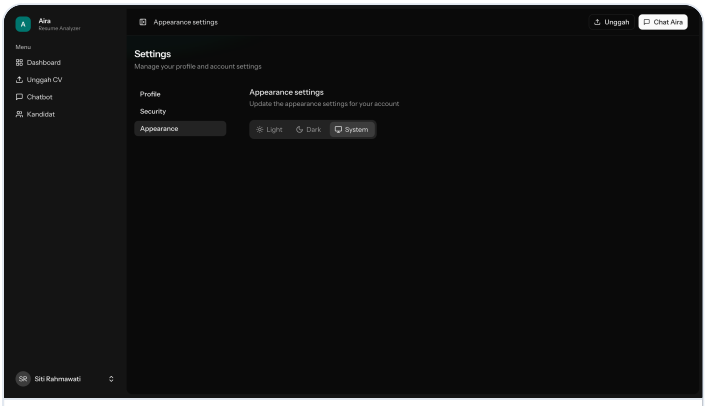

9. Fitur Settings

Apa fungsinya?

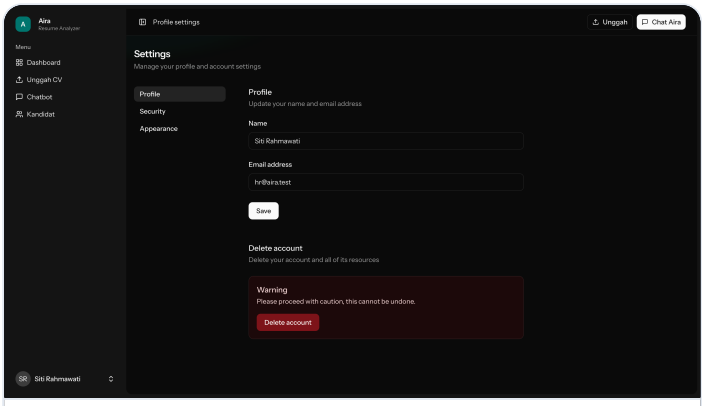

- **Profile** — ubah nama & email, hapus akun
- **Confirm password** — gate sebelum area sensitif
- **Security** — ganti password, 2FA, passkeys
- **Appearance** — tema Light / Dark / System

Flowchart

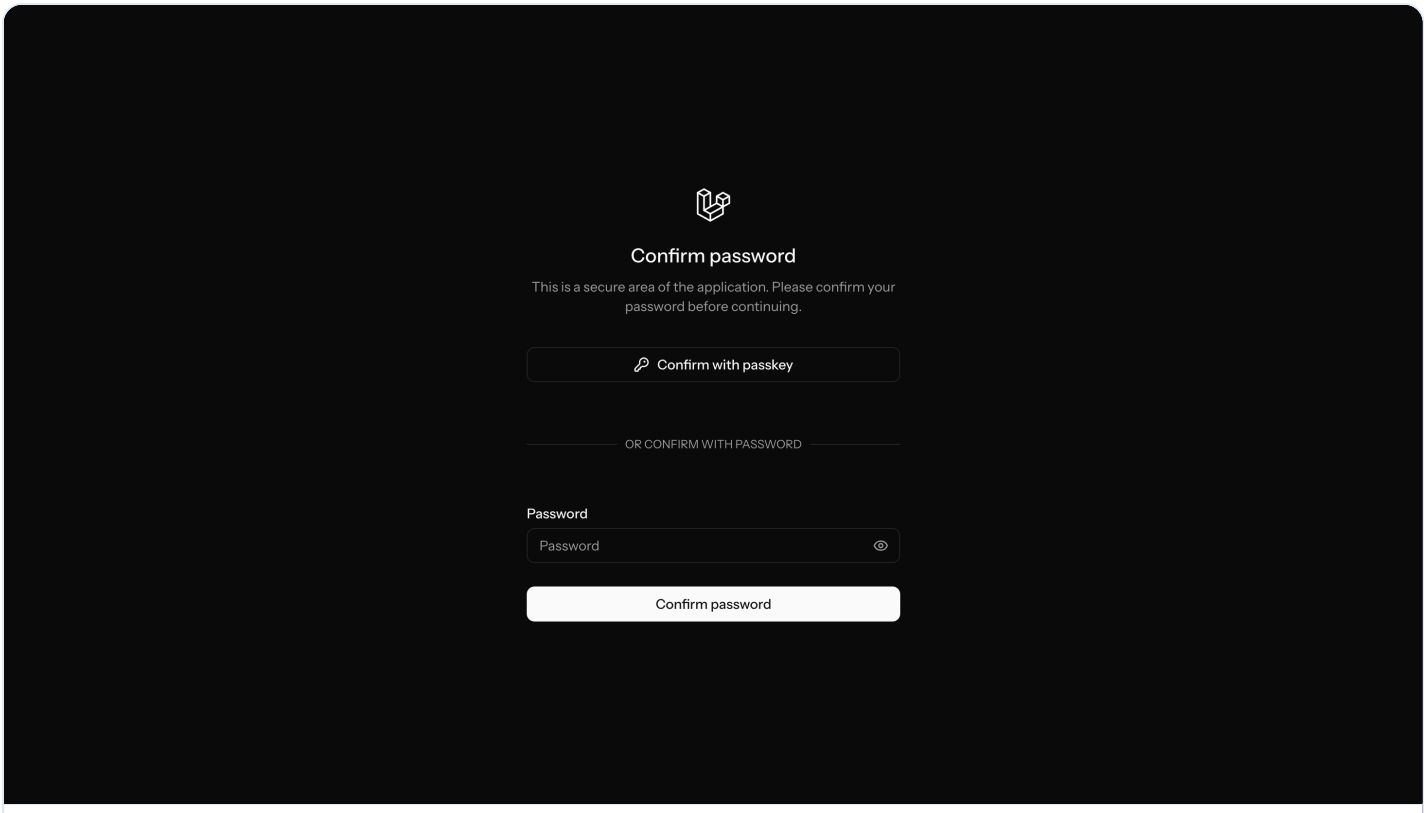

Appearance

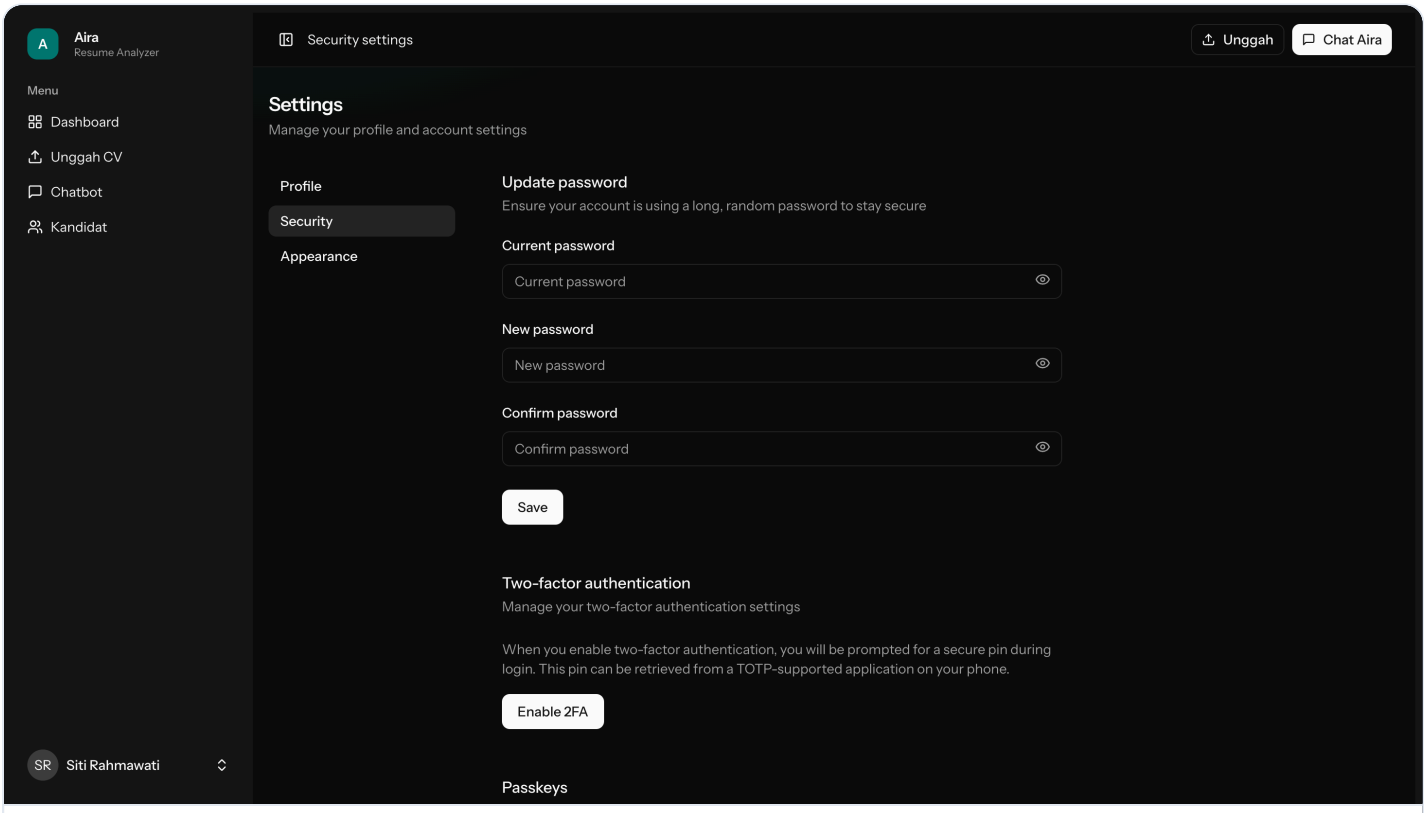

Profile

9b. Confirm password & Security

Confirm password — `/user/confirm-password` · gate keamanan

Security — password, 2FA, passkeys

10. Data model & catatan teknis

Entity	Peran di flow
User	Akun HR (auth, settings)
Candidate	CV terindeks: kategori, sumber, raw_text, review_status
JobOpening	Parameter lowongan untuk lock di chat / upload
ChatThread / ChatMessage	Sesi chat + meta analisis (matches, compare, gap)
MatchResult	Jejak skor matching

Catatan teknis penting

- Panel match membaca assistant **terakhir** (order by id desc) agar tidak stuck hasil search lama setelah compare.
- Filter kandidat: Inertia `router.get` + `preserveScroll` (hindari stale list).
- Composer chat: FieldSelect `side="top"` supaya dropdown tidak terpotong.
- Gemini opsional non-blocking (timeout 8 detik).
